

# The Shadow Knows

Who knows what evil lurks in the hearts of men? The Shadow knows!

## **Tenth Edition September 2024**

Warnings about the next pandemic are for the Eastern Equine Encephalitis and for Monkey Pox Virus. Reports of them in humans have been received in both the United States and other countries. It is unknown if these are false flags like the Black Mold and White Lung were last winter but since Radionics can resolve issues such as these without cost and only a small amount of time, we are both reporting them and providing stored rates. There are also rumors about Polio but are difficult to believe at this time.

### **Eastern Equine Encephalitis Rates**

10.75-96.00  
28.00-26.50  
46.40-38.10  
27.50-32.00  
39.50-24.50  
36.75-52.80  
28.50-63.75  
15.60-37.25  
49.50-36.00

### **Monkey Pox Virus**

16.50-27.75  
18.00-27.50  
56.10-32.50  
64.00-28.90  
43.75-69.60

### **Monkey Pox Vaccine**

It appears that the Monkey Pox Vaccine is the Smallpox Vaccine and has the same negative side effects. Here are the rates to remove.

4.25, 2.125, 4.4, 2.5, 8.26, 2.5, 2.24, 4.6, 3.5

## **From The Shadow Knows 4<sup>th</sup> Edition – November 2023**

### **Smallpox Infection for 2021 onward.**

10-dial: 4, 3½, 4, 3½, 3½, 5, 3½, 5, 6 ½

### **All versions of Pox.**

5 ¼, 4, 6 ¼, 6 ¼, 1 ½, 3 ½, 2 ½, 4 ¼, 3 ½, 3 ¾, 2 ½, 3 ½,  
4, 4, 3, 4 ½, 4 ¼, 4, 2 ¼, 3 ¼, 2, 2 ¼, 2 ¼, 3 ½, 3 ¾,  
3, 4 ¾, 2 ¾

## **From The Shadow Knows 5<sup>th</sup> Edition – February 2022**

From the book, “Safe, Speedy, and Certain CURE for SMALL-POX” by Charles Rose, published 1877.

**Cream of Tartar, ¾ Ounce (Baking isle in market)**

**Rhubarb, 12 grains (0.78 grams) (Fresh veg or in cans. Used in pies)**

**Water, 1 pint**

**Dissolve in the water**

**Repeat as needed.**

Half pint in early-stage adult, again every three or four hours.

Advanced cases apply hot water bottle to bottom of feet. Provide cold drinks only. No baked goods or meat or fever inducing foods unless necessary until healthy.

## **Review**

Reread 7<sup>th</sup> Edition, August 2022. It contains rates to nullify all man-made/lab-made diseases and biological hazards. It also discusses Monkey Pox.

Get the stored rates card from Page 3 of the 9<sup>th</sup> Edition, August 2023. Everything on that card is still useful and effective.

### **Video about the Vaccine Agenda and why Nicotine Patches may help against snake venom**

<https://rumble.com/v5cvoyd-breaking-exposing-the-vaccine-agenda.-cancer-and-covid-cure-revealed-in-thi.html>

This also discusses the possible role of snake venom in our water supplies. If you use well water this should not be a problem.

### **Black Mold / White Lung**

Human infection of black mold and white lung were warned about since winter 2023. This information may be moot since these infection vectors did not become pandemic last year. These are winter type infections, so the information is presented for your information.

White Lung is a Chinese originating pneumonia. Black mold is an opportunistic infection that is especially hard on anyone with an impaired immune system including diabetics that appears to have originated in India.

Dr Drew Pinsky, doctor at The Wellness Company, explains: *"White Lung" is a name for pneumonia infections seen last winter in the United States. This outbreak seems to be the result of RSV Influenza, and most likely common Mycoplasma. The first line Mycoplasma treatment for adults is Azithromycin (Z-pak) - a core life-saving medicine.*

Common veterinary use of Azithromycin is for birds. (Chickens, ducks, turkeys, etc....)

*RSV is Respiratory Syncytial Virus and is highly contagious.*

Prevention can include avoidance of anyone infected, staying hydrated, breathing through a scarf to prevent drying and cracking of the nasal membranes when in cold dry places. Home humidifiers can help but can be a cause of other problems. Only the boiler or natural evaporative humidifiers (fan blowing air over a frequently changed paper wick) are recommended. Ultrasonic evaporators are not recommended. Vitamins and minerals should be considered.

If medical care is not available attempt to use colloidal silver, heat, be careful of dehydration but too much water is just as bad, vitamins and minerals and have person lie on their stomach to open the back of the lungs for breathing. This process is called proning. During the Covid-19 epidemic it was discovered in Northern Italy to be more effective than ventilators. Get to a hospital as soon as possible and if they want to use a ventilator be careful that the standard of care may rupture the lungs.

Black mold is a group of molds called Mucormycosis, also known as black fungus, is a rare but dangerous infection. It often affects the sinuses, lungs, skin, and brain. The mold spores can be inhaled or in things like soil, rotting produce and bread, or compost piles. People with the infection can look like zombies. This infection started in May 2021 in India and may be ongoing and has spread to the United Kingdom where fatalities are 10 times the fatalities of India. (*We don't know what this means in actual numbers, it could be insignificant.*) Its primary cause is overuse of steroids (often prescribed for Covid-19 cytokine storms) limiting the immune system's overreaction to infection.

(*Rammaert B, Lanternier F, Poirée S, Kania R, Lortholary O. Diabetes and mucormycosis: a complex interplay. Diabetes Metab. 2012;38(3):193–204. doi: 10.1016/j.diabet.2012.01.002.*)

Standard medical treatments are intravenous antifungal. Prevention includes discontinuation of aggressive steroids under medical control, control of diabetes by reducing carbohydrate foods. Use of the Uttar Pradesh Ivermectin based Covid-19 home treatment kit has also shown results with black mold. This kit coupled with antibacterial, vitamins and minerals have been found to be effective against Covid-19 and black fungus.

If medical care is not available attempt to use colloidal silver. Due to an increase in drug resistant fungal strains consider colloidal silver. Silver nanoparticles are proven to be antifungal.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC9583421/>  
*Biogenic silver nanoparticles as antifungal agents*

Topical use of Tea Tree Oil, Thyme, Cinnamon, Oregano, Clove, and Mint oils are worth examining. Fresh clove tea is tasty. Put dried cloves in a

teapot, pour hot water on the cloves. When the water turns brown it is ready to drink. Sweeten if desired.

### **Coke and Pepsi**

The Coca Cola corporation has signed a 5-year contract with Microsoft to provide computer cloud services to Coca Cola.

<https://news.microsoft.com/2024/04/23/the-coca-cola-company-and-microsoft-announce-five-year-strategic-partnership-to-accelerate-cloud-and-generative-ai-initiatives/>

Normally that would not be of much interest, except for some coincidences. First the size of the contract is big. How could someone that makes flavored sugar water need that much computing power? I am sure they have a completely innocent answer. The second is that self-assembling fluorescent nanoparticles were found in Coke. Later they were also found in Pepsi, which is a competing company. Of course, Vanguard Group owns 9.29% of the shares in PepsiCo and BlackRock, an interlocked company with Vanguard, owns 7.84%. That means that the two interlocked companies own 17.13% of Pepsi. Vanguard owns 8.51% of Coca Cola while Black Rock owns 7.19% of Coca Cola for a total of 15.7%. Both companies have been attributed to involvement in both the vaccines and in Woke Culture. *While not confirmed, it is rumored that Berkshire Hathaway owns substantial portions of both Vanguard and Black Rock companies.* Berkshire Hathaway (Warren Buffett) reports that it owns 400 million shares, 10.14% of Coca-Cola making it the largest investor in the company. If true, that means that Warren Buffet controls  $15.7\% + 10.14\% = 25.83\%$ . Berkshire Hathaway appears to not own any shares in Pepsi.

It appears that the nanoparticles do not self-assemble while under the pressure of carbonation. Once that pressure is released and oxygen is present the particles can be seen to self-assemble into a lattice work like an antenna. The particles are fluorescent under normal light.

If you must have cola but avoid micro-particles, purchase a brand made by a small company, locally. It is not known what other flavors of drinks made by Pepsi and Coke may have micro-bots.

Here is a microscope photo of a self-assembling nanobot in a drop of Pepsi.

### **Soda Nano-Bots Removal Rates**

8.74, 8.8, 8.75, 7.6, 8.27, 6.74, 5.26, 6.5, 8.25, 9

### **Videos about Coke and Pepsi nanobots**

### **Strange News about Chicken Eggs**

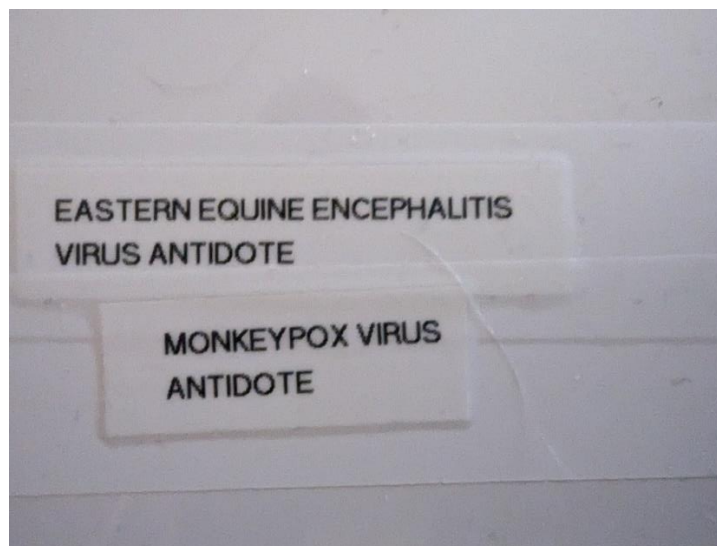

For the last 6 months, when purchasing fresh corporate raised eggs from the store, the whites are watery. This usually indicates the egg is stale, even when the expiration date is a couple of months away. The egg also has thin shells that break easily, sometimes by just picking them up. This indicates the chickens have a calcium deficiency. This is an indicator of inferior feed and not pasture raised chickens. If you have the option, grow your own or buy from a local farmer. Try to buy unwashed eggs which do

not need refrigeration and can be water glassed. Water-glassed eggs stay fresh on the shelf for up to 18 months.

There is some discussion, unconfirmed, that commercial chicken feed now contains micro-bots which may be passed into the egg. If true, this could explain the issues mentioned.

## Soda Nano-bot Removal

***Many plans are in a man's heart, but the purpose of the LORD will prevail. Isaiah 43:13 Even from eternity I am He, and none can deliver out of My hand. When I act, who can reverse it?***

**Opinion:** Evil knows it is losing. Every day there is a new announcement. Many of the evil are dying. Is this the Elite Evil disposing of witnesses? Maybe. Evil has always eaten its own. The only observation we need to take of Evil's actions is that they are losing. It may take a long time, but the conclusion is inevitable. We just need to protect ourselves and ours while the actions play out.

Remember the words of the infamous war criminal Hermann Goering the world's first master of modern propaganda: "There will come a day, when all the lies will collapse under their own weight, and truth will again triumph."
